

H. TRACY HALL

BIOGRAPHICAL SKETCH

January 1979 - March 1981

Hall, Howard Tracy

Current Address:

1711 No. Lambert Lane, Provo, Utah 84601; Home Phone (801) 373-3323; Office, B-41  
Brigham Young University, Provo, Utah 84602; Phone (801) 374-1211, Ext. 4741

378-0300

Born:

Ogden, Utah, 20 October 1919 (parents: Howard and Florence Tracy Hall).

Married:

To Ida Rose Langford, 24 September 1941 in Salt Lake City, Utah.

Children:

Sherlene, Howard Tracy, Jr., David Richard, Elizabeth, Virginia, Charlotte, Nancy.

Education:

Assoc. Sci. [Weber College 1939] B. S. 1942, M. S. 1943, Ph.D. 1948 (Physical Chemistry) University of Utah, Special wartime training, 11 months in electronics at Bowden College, M.I.T., Harvard and Honolulu Naval Base while an Ensign, U. S. Navy, 1944-1946.

Employment:

1980 → Distinguished Professor, emeritus, Brigham Young University, Provo, Utah  
1967, Distinguished Professor, Brigham Young University, Provo, Utah.  
1955-1967, Director of Research for the entire University and Professor of Chemistry, Brigham Young University, Provo, Utah.  
1948-1955, Research Associate, General Electric Research Laboratory, Schenectady, New York.  
1942-1944 & 1946, Chemist, U. S. Bureau of Mines, Salt Lake City, Utah.  
1940-1942, Chemical Analyst, Sperry Flour Mills, Ogden, Utah (part time)  
1939-1940, Photographer, Checketts Photo, Ogden, Utah.

Military Service:

Ensign, U. S. Navy, 1944-1946.

Miscellaneous:

1953 - Designer and builder of High Pressure, High Temperature Equipment.

## Honors & Distinctions of H. Tracy Hall

- 1980 Admitted to practice patent law before the U.S. Patent and Trademark office as an agent, registration no. 29,800, June 23.
- 1980 "Man of the year award", Abrasive Engineering Society, Milwaukee, Wisconsin
- 1978 "Karl S. Maser Research Award", Brigham Young University, Provo, Utah, August 31
- 1977 "International Prize for New Materials", The American Physical Society, San Diego, California, March 22
- 1975 "Distinguished Alumni Award" Weber State University, Ogden, Utah, October 16
- 1974 "IR-100 Award", Industrial Research Magazine "for Indelible Sintered Diamond Tools", Chicago, October 8.
- 1973 "Engineering Materials Achievement Award", The American Society for Metals, Chicago, Illinois
- 
- 1973 American Chemical Society Tour Speaker (Texas, Louisiana)
- 1973 The American Society for Metals "Engineering Materials Achievement Award", Chicago, Oct. 2, Conrad Hilton Grand Ballroom.
- 1972 American Chemical Society Tour Speaker (Oregon, Washington)
- 1972 Fellow, The American Institute of Chemists
- 1972 The Intermountain Society of Inventors and Designers "Certificate for Distinguished Service and Leadership in the Field of Invention and Designing", Salt Lake City, Utah, May 20
- 1972 Fellow, The Utah Academy of Science, Arts, and Letters
- 1972 The American Chemical Society "Award for Creative Invention", Boston, Mass., April 10
- 1971 Honorary Doctor of Science Degree, Brigham Young University, Commencement Exercises, Provo, Utah, May 28
- 1971 "Outstanding Manhood Award", presented by Associated Men Students, Brigham Young University, Provo, Utah, April 13
- 1970-1973 Member of National Academy of Science--National Research Council Evaluation Panel for the National Bureau of Standards Heat Division
- 1970 Cortez Honors Lecture, Weber State University, Sec 10, Ogden, Utah
- 1970 American Institute of Chemist's "Chemical Pioneer Award", Pittsburgh, Pennsylvania, May 16
- 1968- Member of Joint Army-Navy-Air Force Thermochemical Tables Advisory Group
- 1967- Distinguished Professor of Chemistry and Chemical Engineering, Brigham Young University
- 1967 Robert A. Welch Foundation, "Lecturer in Chemistry", Texas Universities
- 1966-1969 Member of Editorial Board, "The Review of Scientific Instruments"
- 1965 The American Chemical Society, Salt Lake Section's "Utah Award", University of Utah, Salt Lake City, December 9
- 1965 The National Association of Manufacturer's "Modern Pioneers in Creative Industry Award", The Waldorf Astoria, New York City, December 2
- 1965 The Brigham Young University's "James E. Talmage Scientific Achievement Award", Baccalaureate Exercises, Provo, Utah, May 27

- 1964 Third Annual "Olin Mathesen Lecture", Yale University, New Haven, Connecticut, April 22
- 1964 First "Annual Faculty Lecture", Brigham Young University, Provo, Utah, April 8
- 1962 The American Society of Tool and Manufacturing Engineers "Research Medal". New York City
- 1961-1964 Member of Editorial Board, "Inorganic Chemistry"
- 1960-1961 President, Utah Academy of Sciences, Arts and Letters
- 1960 Fellow, American Association for the Advancement of Science
- 1959-1963 Alfred P. Sloan Foundation Research Fellow
- 1959 Chairman, Salt Lake Section, American Chemical Society
- 1954 First to synthesize diamond, December 16, 1954, G.E. Research Lab, Schenectady, N.Y.

~~as of Dec 1973~~ Publications - 76 in number  
~~patents~~ - 57 in number  
~~outside research grants received~~  
~~during 18 years at BYU = 44~~  
~~and exceeds one million dollars~~

Professional Society Membership:

American Chemical Society, American Association for the Advancement of Science, The American Physical Society, The Mathematical Association of America, Sigma Xi, Phi Kappa Phi, Timpanogos Club of Utah, Utah Academy of Science, Arts and Letters, Newcomen Society in North America.

Major Scientific Achievements:

1. The first synthesis of diamond (1954). This feat had eluded scientists for over 150 years.
2. The first high pressure, high temperature apparatus, "The Belt." (100,000 + atmospheres, simultaneously with 2000 + Degrees C.) (1953).
3. Determination of the first melting curve under high pressure, high temperature conditions (for Germanium) (1954).
4. The second high pressure, high temperature apparatus, "The Tetrahedral Press," which circumvented the proprietary interest that prevented use of the Belt for research after leaving General Electric's employ (1956).
5. The first high pressure, high temperature X-ray diffraction apparatus (with J. Dean Barnett) (1962).
6. Discovery of the first pressure-induced phase change from a close-packed to non-close-packed structure (FCC to BCC in Ytterbium at 40 kb), (with J. D. Barnett and Leo Merrill)(1963).
7. The determination of the nature of the "resistance cusp" in cesium. This intriguing problem had remained unsolved since discovery of the cusp by P. W. Bridgman in 1951 (with Leo Merrill and J. Dean Barnett)(1964).
8. The concept of "Periodic Compounds" (1965).
9. Sintered Diamond (similar to natural carbonado type diamond) (1970). The bonding together of fine diamond particles to produce a dense, strong, polycrystalline body of desired shape having properties equal to or exceeding those of natural carbonado heralds a new era in diamond technology. This new material is already finding use in wheel dressers, wire drawing dies, drilling stones, cutting tools, and in electronics. Thin disks, cylinders with axial holes, nozzles, rings, spheres, cubes and other molded shapes up to 20 carat size are currently possible and will certainly revolutionize the diamond industry in the next decade. In addition, this discovery just about takes care of the problem of strategic diamond materials. In industrial diamonds, the United States will soon approach self sufficiency.

Other Responsibilities:

Director of Brigham Young University High Pressure Laboratory, 1955----

Director of the National High Pressure Data Center which is run by Brigham Young University for the U. S. National Bureau of Standards, 1965----

"High Pressure Press" (Tetrahedral Anvil Apparatus)  
Assignee: Research Corporation  
Foreign Patents and Numbers:  
Great Britain 847,067  
Canada 622,429
3. U. S. 2,941,242, June 21, 1960.  
"High Temperature - High Pressure Apparatus."  
Assignee: General Electric Company.  
Foreign Patents and Numbers:  
Canada 624,376  
England 830,209
4. U. S. 2,941,248, June 1, 1960.  
"High Temperature - High Pressure Apparatus" (The Belt)  
Assignee: General Electric Company  
Foreign Patents and Numbers:  
Argentina 122,934  
Australia 244,497  
Belgium 582,483  
France 1,243,894  
Holland 108,063  
Italy 615,588  
Japan 311,237  
Israel 16,123  
South Africa 3549/59  
Switzerland 377,319
5. U. S. 2,941,250, June 21, 1960. "Reaction Vessel"  
Assignee: General Electric Company
6. U. S. 2,947,610, August 2, 1960. "Method of Making Diamonds"  
Assignee: General Electric Company  
Foreign Patents and Numbers:  
Argentina 122,044  
Australia 244,185  
Belgium 582,479  
France 1,243,889  
Holland 105,122  
India 68,990  
Israel 16,118  
Italy 615,335  
Luxembourg 37,645  
Switzerland 365,059

7. U. S. 2,947,608, August 2, 1960. "Diamond Synthesis"  
 Assignee: General Electric Company  
 Foreign Patents and Numbers:
- |            |           |
|------------|-----------|
| Argentina  | 122,721   |
| Austria    | 223,173   |
| Belgium    | 582,481   |
| Canada     | 638,043   |
| England    | 840,770   |
| France     | 1,243,888 |
| India      | 68,989    |
| Italy      | 615,336   |
| Japan      | 302,022   |
| Luxembourg | 37,663    |
| Norway     | 97,992    |
8. U. S. 2,944,289, July 12, 1960 "Reaction Vessel"  
 Assignee: General Electric Company
9. U. S. 3,158,442, November 24, 1964.  
 "Method of Making High Compressive Strength Silicon Carbide and the Product Thereof."  
 Assignee: Research Corporation
10. U. S. 3,159,876, December 8, 1964. "High Pressure Press"  
 Assignee: Research Corporation
11. U. S. 3,182,353, May 11, 1965. "Guide Means for High Pressure Press"  
 Assignee: Research Corporation
12. U. S. 3,249,753, May 3, 1966. "High Pressure-High Temperature X-Ray Diffraction Apparatus," with J. Dean Barnett.  
 Assignee: None
13. U. S. 3,440,687, April 29, 1969. "Multianvil Press"  
 Assignee: None  
 Foreign Patents and Numbers: South Africa 67/1656
14. U. S. 3,816,085, June 11, 1974. Diamond-Nondiamond Carbon Polycrystalline Composites.  
 Assignee: Megadiamond Corporation *also corresponding foreign patents*
15. U. S. 3,829,544, August 13, 1974. Method of Making a Unitary Polycrystalline Diamond Composite and Diamond Composite Produced Thereby.  
 Assignee: Megadiamond Corporation *also corresponding foreign patents*
16. U.S. 4,104,344, August 1, 1978, High Thermal Conductivity Substrate (with B. J. Pipe and M. Duane Norton)  
 Assignee: Brigham Young University
17. U.S. 4,163,769, August 7, 1979, High Thermal Conductivity Substrate (with B. J. Pipe and M. Duane Norton)  
 Assignee: Brigham Young University)
