

Tracy I remember talking to Aunt
Nanny when I was a kid. She gave
me a little silver spoon or something,
when we lived on Jefferson Ave.

There were 7 ^{mothers} sisters - Mary Ann, Stella,
Emma, Lina, Nanny. (didn't name one)
(did mother side) Rose.

She got them from Henry C's Bible,
who's got the book.

with ^{ton} truck
one other time as he was going to
Evanston, he was on the hill go up
towards Wasatch. He was in a
cut - engine stalled - knew brakes wouldn't
hold so he just pushed the end of the
truck into the ^{sub} bank & started up engine,
turned around & got up hill all right -
Load furniture

D.P. question - Dad did you spatter
ever ~~talk~~ you talk about her mom.
and father?

Don't know anything about
G. J. George Woodcox (Corrected by D.P. to
Alfred) but we went back to visit.
George Woodcox was dead at that time.
She was a big woman - tall & large.
Scotch Irish. (Naomie McElroy)
She was a very kindly woman. Lived in
Mt Vernon, Ia. about 14 or 15 miles out
of Mt Vernon. None of them seemed
to be very religious. Stella youngest,
uncle John Bennett worked on a
farm - had a lot of pig pens. I got
hauled in one of those pens & a
Boar came after me - boy did I
get upon top of that fence. (He was
abt 8 yrs old) Went & came back
on R.R. his dad working on So Pacific.
~~But~~ Naomie didn't die until 1911.
Don't have George's
Emma, Bob, Vera, Naomie, &
Stella.

evening when the road was dry
enough to get started again & ~~dry~~. We
had lights on the truck & could drive
anytime. I must have been there
8 or 10 hrs until I'd get dry & started out
& get to Mt Pleasant,

Dray: Did Hume, C Hall's sister live with
Wm Henry C with his J. father after
his father died.

Ans: must have done but I
never heard him say anything
out his sisters. He just
Henry C was baby

Cont - Had to go thru River Dale &
So Weber to get up Weber Canyon in
those days. As I was going up the
road from Roundale to So Weber the l.
front wheel dropped right.

what a ton cont. motor republic
truck -

I had to get that wheel back on
again. The iron tire goes around the
wheel & then the tire goes over that
so I had to fix wheel. I took it
easy rest of trip, as I all the way to
Evanston. As I got up the canyon
to mt. view, I went to a farm
house & they gave me supper &
put me up for the night. I had
breakfast there & went on up to
Evanston.

Henry C got a Ford truck in 1912.
Then got a model T Ford & extended
frame on it + put a frame with
wheels on it and then sprockets
on these wheels and a chain from the
sprockets on rear axle of truck and
thru to these - Chain drive you know -
made a ton truck out of it, you
know. Body frame extended +
on this frame 2 wheels, 2 wheels
with large sprockets on them +
small sprockets on axle of the Ford
and that gave it lots of power. That
truck went all over - Eastern Wyo. +
Bingham Canyon hauling furniture
mostly. They protected the furniture
with Tarp. Then he got a 2 Ton
truck + a truck with a continental
engine - a van, you know - moved
furniture to Pocatello + Evanston +
all around.

~~But~~ Sam + Ralph worked with him
too.

He (Howard) tells of an experience with the
van. Went to Mt Pleasant, Trucks had
solid rubber tires on rear wheels in
those days. When they got on a dirt road
the pull was so hard such an exertion
on the engine it pulled the bearings right
out + the pistons. I went to S.L. + got
some bearings. Put the bearings in out on
that dirt road + waited until the
