

board assigned us to teach the women to quilt.

81-83

3 M glue - ~~foam~~ spray can - amazed to find  
in a hardware store -

Clamps -

hard to find <sup>soft</sup> wood - too hard

Mr Lucas had a hand saw -

hammer - tape measure - nails -

Faurie  
Faurie - branch President - made a set of  
quilting frames by my directions so the K.S.  
could do large quilts - We didn't have anything  
to show them but I drew out plans  
but the finished product was nothing  
like the drawings. Everything was  
heavy, heavy, . . . Pres Faurie may  
have decided that ~~Faurie's~~ <sup>my</sup> plans were  
"too flimsy" but at any rate the frames  
& the uprights were way too heavy.

When the members saw them ~~they~~  
(even though no one was familiar with  
how quilting frames were supposed to  
look like) they gipped they were  
heavy to support a stage. We ~~donated them to the~~

I knew I would have to build ~~some~~ the  
~~the~~ frames myself to get what we needed  
we donated ~~the~~ Faurie's frames to the  
Harare Relief Society. (white work)
