

board assigned us to teach the women to quilt.

81-83

3 M glue - ~~foam~~ spray can - amazed to find
in a hardware store -

Clamps -

hard to find ^{soft} wood - too hard

Mr Lucas had a hand saw -

hammer - tape measure - nails -

Faurie
Faurie - branch President - made a set of
quilting frames by my directions so the K.S.
could do large quilts - We didn't have anything
to show them but ~~I~~ I "drew out plans
but the finished product was nothing
like the drawings. Everything was
heavy, heavy, . . . Pres Faurie may
have decided that ~~Faurie's~~ ^{my} plans were
"too flimsy" but at any rate the frames
& the uprights were way to heavy.

When the members saw them ~~they~~
(even though no one was familiar with
how quilting frames were supposed to
look like) they gupped they were
heavy to support a stage. We ~~donated them to the~~

I knew I would have to build ~~some~~ the
~~the~~ frames myself to get what we needed
we donated ~~the~~ ^{for} Faurie's frames to the
Harare relief Society. (white ward)
