

Mar 13 - Church. Gardening Seminar. The children's
Sunday Primary Program. It's a whole new
bunch of faces since I was Primary
president. Made me lonely for the
children. Mr. Kezian held a gardening
seminar. Harold Colvin was the
speaker.

Mar 14 - Tues. - History Test - No on multiple choice
part of test. probably did O.K. on
the essay part.

Mar 14 - Mon. - ~~Go to California~~ forgot to put an
important entry in diary. The
funeral for Donna Rae & Bill
Dooley's son was today. He was
21. The and Bill have been
feeding David & bathing & lifting
that way for 10 years & they
had another boy who died at 1.
Bart who was disabled the same
way. Bill is Tracy's secretary.
They are dear friends of ours
since the Stadium village days.
Donna Rae spoke at his funeral
and did a beautiful job.
We went up to the cemetery in S.L.
Hans Radwan Chlarn - has
several children buried in that
cemetery.

Mar 16 - Trip to Cal. Left about 9 A.M. Charlotte
Weds. is going to stay at Carities with Emma Jane
It was nice of Jenny to ask her, I
suspect she will have a wonderful
time. We drove until we got to
Barstow which was about 7 P.M.
Tracy wasn't feeling top shape so
I did a lot of the driving. Had good
weather all the way.

Thurs - Arrived in L.A. Stayed at the
Mar 17 motel 6 in Rosemead. I like this
motel because it is close to the
Orchid growers. After ~~registering~~ after
sending me could register at noon
& probably got a room although
they were theoretically full, we went
orchid hunting. We went out to
Stewart's Gubler's to check on bark I
ordered. I bought 4 babies (they
speculate in seedlings) and then
went to Stewart's. I have such a
wonderful indulgent husband. He
let me spend almost \$200 total but the
two places. Included in this was an
orchid for Donna Rae. I got 2 SM's
(mystic) which should bloom next yr.
(white & Purple & a pink) Since I lost my
gorgeous phalaenopsis, I got 2 white ones
one in bloom & one in bud for 1st time.
I also got three white unbloomeds
one is ~~sup~~ marked C - Bambur. These
are gambles but are named varieties &
should be good.
