

Lecture - Dr Gunn - July 18, Friday

Impressions of what man has done with forces of nature.

A Boulder Colorado's anatomic clock

1- meas. amt of time a beam of light takes to go across an atom.

B- master designer is the Lord Land creator

1- Fingerprints of Lord's Hand -
Mendenhall glacier.

a- basic rock of which earth made
1) note striations the glacier

have made as they moved along

b- volcanoes - create new land -

c- plants & weather work on
the rocks -

1- becomes soil

Dr Gunn mentions participation of
earth in creation of world -

a- Grass & moss at first

1) earth being created

in Glacial formations the earth

exposed first becomes green - with
grass & moss - then alder trees

c- alder trees - nitrogen nodules - adds
nutrients to their soil - (shows pictures)

D. Then comes Spruces - alders die.

Earth is creating itself -

Have appreciation for earth as it comes to being.

Dr. Lindquist:

Different perspectives, the perspective of a scientist.

Notes spent of the land.

a. for useless facts - get an almanac
1964 - antique newspaper w/ Alaskan
earthquake.

wants to expand on Dr. Luan's talk

Church in Alaska

1900 - first bapt. in Nome.

1925 - 2 missionaries

dedicated land for missionary work
makes promise:

land would become more temperate
Church gains membership as "trees
get hold in Alaska"

winters have been tempered.
Anchorage. N.Y.'s day 50°.

16,000 mem. of church in Alaska now.

Dr. Lindquist feels ^{members} they were "impelled"
by God to come to Alaska to build church
there.

They love pristine beauty of land,
in Alaska.

There was 3 chapels in Fairbanks.
