³² R. A. Robinson and R. H. Stokes, *Electrolyte Solutions* (Butterworths, London; 2nd Edition, 1959), p. 230. The expression quoted gives the mean ion activity coefficient on the mole fraction scale, whereas eqn (3) strictly requires the activity coefficient on the molar scale. For the low values of c involved, these quantities are practically identical (see this reference, p. 32).
