

PLATE 3

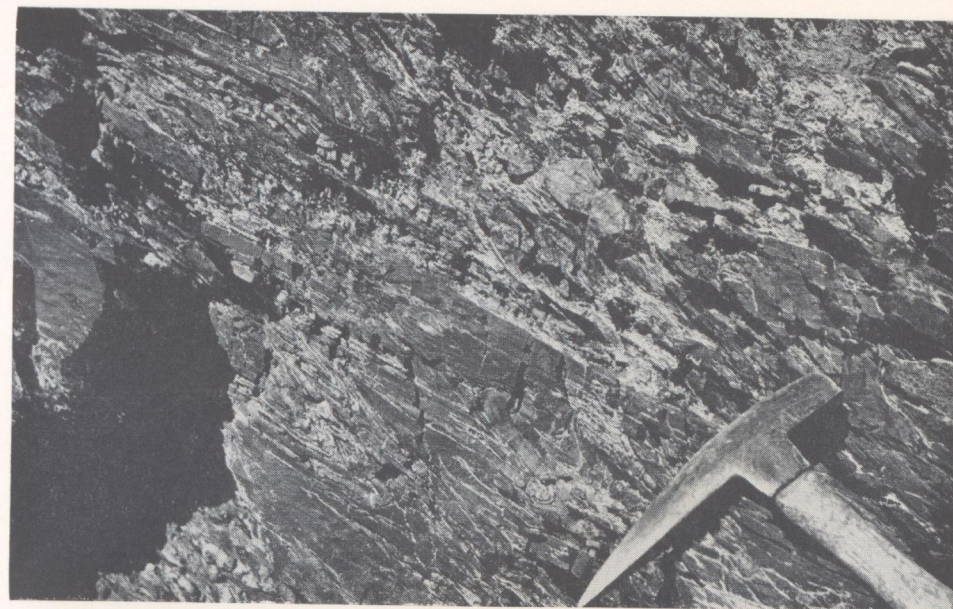

Folding in the zone of secondary deformation,  
Stack of Glencoul area

*a.* Exposure near the eastern margin of the zone of secondary deformation, half a mile northeast of the Stack of Glencoul. Several kink zones dip toward the east.

*b.* Exposure of phyllonite in the valley of the Glencoul River, showing small-scale folds. The axial planes of the folds (parallel to the hammer shaft) dip toward the east.
