

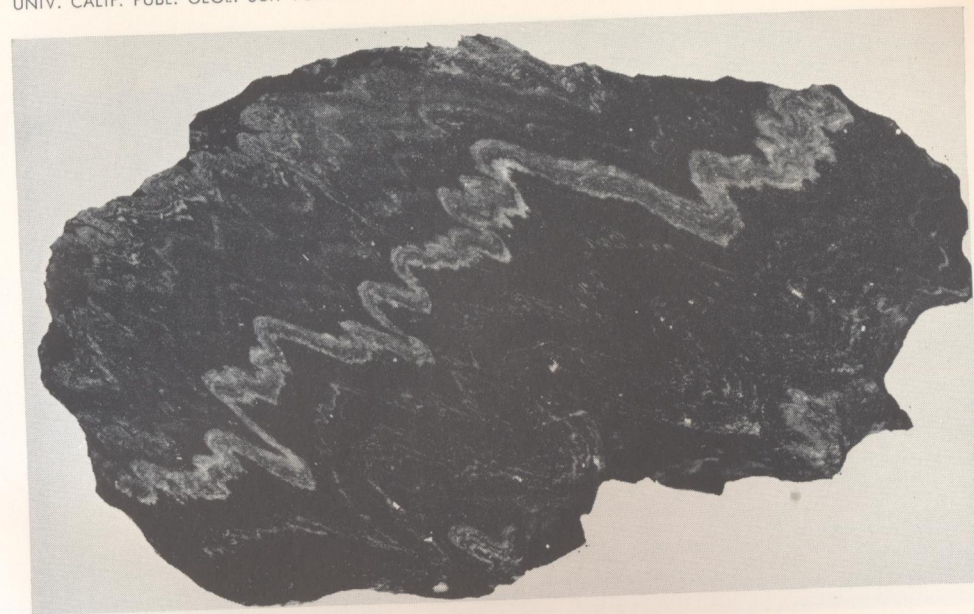

PLATE 4

Folds in the zone of secondary deformation, in the  
Cnoc a' Chaoruinn area

*a.* Specimen of folded phyllonite from disused quarry, half a  
mile southeast of Ben More road. Specimen is 4 inches across.

*b.* Block of folded phyllonite at same locality as *a*, showing the  
characteristic style of folding. Axial planes of folds dip toward  
the east.
