

FIG. 7. Shock data for shoal granite.

(13), and (15), lead to errors in pressures and material velocities of less than 4% and 2.5%, respectively.

#### ACKNOWLEDGMENT

The original data were obtained under Atomic Energy Commission contract. The author is grateful for that support.

\* Presently at Martin Marietta Corporation, P.O. Box 179, Denver, Colo. 80201.

† Experimental work was done at IIT Research Institute.
