

TABLE OF CONTENTS

	Page
ABSTRACT	ii
LIST OF TABLES	vi
LIST OF ILLUSTRATIONS	vii
I. INTRODUCTION	1
II. EXPERIMENTAL PLAN AND PROCEDURE	6
A. Choice of Material	6
B. Constraints on Experimental Configuration	8
C. Impact Arrangement	10
D. Sample Characterization and Preparation	12
E. Target Assembly	19
F. Projectile	21
G. Recording System	22
III. THEORY-ANALYSIS	25
A. Resistivity Theory and Analysis	27
1. Volume Dependence of Resistivity due to Lattice Vibrations	27
2. A Semi-empirical Approach	30
3. Volume Dependence of Impurity Resistivity	36
4. Final Resistivity Analysis	
5. Resistance to Resistivity Transformation	40
6. Piezoresistance Effects	40
7. Resistivity-Pressure Data of Bridgman	41
B. Equation of State	42
C. Strength Effects	46
D. Work of Plastic Deformation	48
E. Temperature Calculations	49
1. Reverberation Temperature Calculation	51
2. Temperature Rise due to Plastic Deformation	55
3. Temperature Rise due to Porosity	58

	Page
F. Voltage Droop Correction	58
IV. RESULTS OF EXPERIMENTS AND DISCUSSION	61
A. Summary of Impact Experiment Results	61
B. Error Analysis	67
C. Voltage-Time Profiles	72
D. Isothermal Results	76
E. Dislocation Models	81
F. Energy Balance	88
G. Model for Effect of Purity on Shock Resistivity	93
H. Effect of Anneal on Shock Resistivity	99
I. Discussion of Resistivity Time Dependence	100
J. Heat Flow Calculation and Discussion	102
K. Work on Recovered Silver Foil	105
L. Discussion of Details of Specimen State	110
1. Effect of Foil Thickness Variation on Results	110
2. Effect of Specimen Handling on State of Anneal	110
3. Condition of Foil Surfaces	111
4. Grain Size and Preferred Orientation.	112
V. CONCLUSIONS AND RECOMMENDATIONS	115
A. Conclusions	115
B. Recommendations	117
REFERENCES	118
APPENDIX	
A. VOLTAGE-TIME PROFILES	125
B. FOIL STRETCHING	133
C. DETAILS OF VARIATIONS IN EXPERIMENTAL PROCEDURE	136
D. THREE-SLAB HEAT FLOW DERIVATION	139
E. LIST OF SYMBOLS	145
