

LIST OF TABLES

Table	Page
I. Results of Impact Experiments	63
II. Results of Data Analysis	66
III. Results of Heat Flow Calculation	104
IV. Results of Post-shock Anneal	107

LIST OF ILLUSTRATIONS

Figure	Page
1. Schematic Diagram of Impact Configuration Showing Impactor and Target Assemblies	11
2. Details of Foil-Anvil Sandwich	15
3. Electronic Measuring System	23
4. Analysis Flow Chart	26
5. Noble Metal Fermi Surface and First Brillouin Zone	34
6. Work of Plastic Deformation vs. Compression	50
7. Reverberation States in (t,x) and (P,u) Planes	52
8. Hugoniot Temperature Rise vs. Pressure	70
9. Oscilloscope Records	73
10. Isothermal Resistivity vs. Compression	77
11. Deviation Resistivity vs. Pressure	78
12. Motion of a Jogged Screw Dislocation	83
13. Motion of Jogged Dislocations of Mixed Character at Low and High Speeds	85
14. Deviation Resistivity vs. Square of Strain	89
15. Logarithmic Plot of Deviation Resistivity vs. Strain	90
16. Stress Relaxation Dependence on Purity	95
17. Scanning Electron Micrographs (1000X) of Shocked and Unshocked Silver Foil	109
A.1. Voltage-Time Profiles	119
D.1. Three-Slab Heat Flow Geometry	141
