at A and B in Figure 14 and is shown in Figure 15(a) and (b) for the $\{11\overline{2}0\}$ and $(\overline{1}010)$ surfaces. Also seen in Figure 15(a) are $\{10\overline{1}2\}$ twins and basal slip lines. The single set of pyramidal slip lines seen in Figure 15(a) matched the $\{11\overline{2}2\}$ traces expected for this surface. The slip lines observed in Figure 15(b) also matched the $(11\overline{2}2)$ traces expected for this surface.

Electron transmission microscopy studies did not reveal dislocations with non-basal Burgers vectors. Micrographs were not available at the time of this report.
