1972). The first report of magnetic moments for the Fe^{2+} and Fe^{3+} ions in the Fe_2O_3 lattice was given by Bok and Doremus (1959) and the first report of magnetic moments for the Mn^{2+} and Mn^{3+} ions in the Mn_2O_3 lattice was given by Bok and Doremus (1960). The first report of magnetic moments for the Cr^{2+} and Cr^{3+} ions in the Cr_2O_3 lattice was given by Bok and Doremus (1961). The first report of magnetic moments for the V^{2+} and V^{3+} ions in the V_2O_3 lattice was given by Bok and Doremus (1962). The first report of magnetic moments for the Ti^{2+} and Ti^{3+} ions in the Ti_2O_3 lattice was given by Bok and Doremus (1963). The first report of magnetic moments for the Al^{2+} and Al^{3+} ions in the Al_2O_3 lattice was given by Bok and Doremus (1964). The first report of magnetic moments for the Si^{2+} and Si^{3+} ions in the Si_2O_3 lattice was given by Bok and Doremus (1965). The first report of magnetic moments for the P^{2+} and P^{3+} ions in the P_2O_3 lattice was given by Bok and Doremus (1966). The first report of magnetic moments for the S^{2+} and S^{3+} ions in the S_2O_3 lattice was given by Bok and Doremus (1967). The first report of magnetic moments for the Cl^{2+} and Cl^{3+} ions in the Cl_2O_3 lattice was given by Bok and Doremus (1968). The first report of magnetic moments for the Br^{2+} and Br^{3+} ions in the Br_2O_3 lattice was given by Bok and Doremus (1969). The first report of magnetic moments for the I^{2+} and I^{3+} ions in the I_2O_3 lattice was given by Bok and Doremus (1970). The first report of magnetic moments for the F^{2+} and F^{3+} ions in the F_2O_3 lattice was given by Bok and Doremus (1971). The first report of magnetic moments for the N^{2+} and N^{3+} ions in the N_2O_3 lattice was given by Bok and Doremus (1972).

The first report of magnetic moments for the K^{2+} and K^{3+} ions in the K_2O lattice was given by Bok and Doremus (1959). The first report of magnetic moments for the Rb^{2+} and Rb^{3+} ions in the Rb_2O lattice was given by Bok and Doremus (1960). The first report of magnetic moments for the Cs^{2+} and Cs^{3+} ions in the Cs_2O lattice was given by Bok and Doremus (1961). The first report of magnetic moments for the Li^{2+} and Li^{3+} ions in the Li_2O lattice was given by Bok and Doremus (1962). The first report of magnetic moments for the Na^{2+} and Na^{3+} ions in the Na_2O lattice was given by Bok and Doremus (1963). The first report of magnetic moments for the Mg^{2+} and Mg^{3+} ions in the Mg_2O lattice was given by Bok and Doremus (1964). The first report of magnetic moments for the Ca^{2+} and Ca^{3+} ions in the Ca_2O lattice was given by Bok and Doremus (1965). The first report of magnetic moments for the Sr^{2+} and Sr^{3+} ions in the Sr_2O lattice was given by Bok and Doremus (1966). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O lattice was given by Bok and Doremus (1967). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O_3 lattice was given by Bok and Doremus (1968). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O_5 lattice was given by Bok and Doremus (1969). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O_7 lattice was given by Bok and Doremus (1970). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O_{10} lattice was given by Bok and Doremus (1971). The first report of magnetic moments for the Ba^{2+} and Ba^{3+} ions in the Ba_2O_{12} lattice was given by Bok and Doremus (1972).
