

## DOCUMENT CONTROL DATA - R &amp; D

(Security classification of title, body of abstract and indexing annotation must be entered when the overall report is classified)

1. ORIGINATING ACTIVITY (Corporate author) Department of Aeronautics & Astronautics Stanford University Stanford, California 94305		2a. REPORT SECURITY CLASSIFICATION Unclassified	
3. REPORT TITLE Transport Coefficients of High Pressure Argon in a Magnetic Field		2b. GROUP	
4. DESCRIPTIVE NOTES (Type of report and inclusive dates) Scientific Final			
5. AUTHOR(S) (First name, middle initial, last name) Ralph S. Devoto			
6. REPORT DATE April 1971	7a. TOTAL NO. OF PAGES 120	7b. NO. OF REFS 46	
8a. CONTRACT OR GRANT NO. F33615-70-C-1150	9a. ORIGINATOR'S REPORT NUMBER(S)		
b. PROJECT NO. 7063	9b. OTHER REPORT NO(S) (Any other numbers that may be assigned this report)		
c. DoD Element 61102F	ARL 71-0075		
d. DoD Subelement 681307			
10. DISTRIBUTION STATEMENT Approved for public release, distribution unlimited			
11. SUPPLEMENTARY NOTES TECH OTHER		12. SPONSORING MILITARY ACTIVITY Aerospace Research Laboratories (LV) Air Force Systems Command Wright Patterson Air Force Base, Ohio	
13. ABSTRACT The thermal and electrical conductivity of ionized argon in chemical equilibrium has been computed for temperatures from 3000 - 25000°K at pressures from 0.001 - 1000 atm. Values are given here for these properties with and without an imposed DC magnetic field up to 200kGauss. A comparison is made of the computed properties with measurements in the wall-stabilized arc.
