

Dr C. Domb (now at Cambridge), for many interesting discussions. We are indebted to Mr A. B. Charters of the Clarendon Laboratory for building the cryostats and to Mr A. T. Croxon for his help in taking the readings.

Imperial Chemical Industries, Limited, have been most generous in financial help, in the supply of high-pressure equipment and in valuable advice. In particular we would like to thank Dr J. Ferguson, Dr E. Hunter and Mr G. A. Shephard of I.C.I. (Alkali), Limited, and Mr W. R. D. Manning of I.C.I. (Plastics), Limited.

This work was made possible for one of us by the award of a Department of Scientific and Industrial Research maintenance grant.
