

LIST OF ILLUSTRATIONS

Figure	Page
2.1 Diagram of Experimental Assembly	12
2.2 Photograph of Experimental Assembly	14
2.3 Diagram Showing Relation of Experimental Assembly, Light Source and Camera	16
2.4 Streak Camera Photograph Showing Shock Arrival Times and Free-Surface Traces. Shock No. 7394.	18
2.5 Definition of Parameters Used in Adjusting Streak Camera Data	21
2.6 Shock Velocity as Function of Particle Velocity. Curves labelled 3rd, 4th, are fits based on zero-pressure elastic constants up to 3rd and 4th order respectively for X and Z-cut crystals	23
2.7 Stress-Volume States Resulting From Shock Compression of X-cut Quartz. Solid curve is Bridgman's Hydrostatic Data. Curves labelled 3rd, 4th, are fits based on zero- pressure elastic constants to 3rd and 4th order	24
2.8 Stress-Volume States Resulting From Shock Compression of Y-cut Quartz. Solid curve is Bridgman's Hydrostatic Data	25
2.9 Stress-Volume States Resulting From Shock Compression of Z-cut Quartz. Solid curve is Bridgman's Hydrostatic Data. Curves labelled 3rd, 4th, are fits based on zero-pressure elastic constants to 3rd and 4th order. The curve labelled X represents the tangential stresses, calculated from constants up to and including 3rd order	26
3.1 Extended Metastable Region.	44
4.1 Temperature Independent Equation of State of Iron and α^{eq}	68
5.1 Difference Scheme in Space	71
5.2 Computational Sequence	72
5.3 Flow Chart for the Constitutive Relation	77
5.4 Wave Propagation in Iron at Early Stages	78
5.5 Double Shock in Iron	79
5.6 Relative Magnitude of p and q for $C_L = .1$	80

List of Illustrations--(continued)

5.7	Wave Propagation with $C_L = .02$	82
5.8	Wave Propagation with $C_L = .1$	83
5.9	Wave Propagation with $C_L = .2$	84
5.10	Effect of q at $.4 \mu\text{sec}$	85
5.11	Effect of q at $1. \mu\text{sec}$	86
5.12	q and Speed of Transformation at Fifth Cell	88
5.13	Decay of First Shock in Iron Resulting from Phase Transition	89
5.14	Pressure Profile and Total Stress with Respect to the Rayleigh Line	92
5.15	Total Stress ($p+q$) and Rayleigh Line	93
5.16	The Hugoniot Curve in and Beyond the Coexistence Region.	95
5.17	Path of the Permanent Regime Solution	98
5.18	dp/dx for Permanent Regime Solution	98
5.19	Comparison of Permanent Regime with Transient Profile of Second Shock	99
