

Figure 1 shows the effects of pressure on the $[\text{Ni}(\text{SbtAs})\text{X}]\text{Y}$ complexes, where $\text{SbtAs} = \text{Sb}[(\text{CH}_2)_2\text{As}(\text{CH}_3)_2]_3$.

Acknowledgment

The author wishes to acknowledge the technical assistance of Anthony Quattrochi of ANL, and to thank Professor D. W. Meek of the Ohio State University, Columbus, Ohio, for the supply of complexes used in this study.
