

## TABLE OF CONTENTS

	<u>Page</u>
INTRODUCTION . . . . .	1
HYDROSTATIC EXTRUSION STUDIES. . . . .	3
ANALYSIS OF SEVERAL HIGH-PRESSURE CONTAINER DESIGN CONCEPTS . . . . .	4
Scope of Analysis. . . . .	4
Basis and Method of Analysis. . . . .	6
Definition of Parameters . . . . .	8
Fatigue Criteria . . . . .	8
Fatigue Criterion for Ductile Outer Cylinders . . . . .	8
Fatigue Criterion for High-Strength Liner . . . . .	9
Nondimensional Parameter Analysis and Prediction of Maximum Pressures . . . . .	11
Multi-Ring Container . . . . .	11
Ring-Segment Container . . . . .	14
Ring-Fluid-Segment Container . . . . .	14
Pin-Segment Container . . . . .	14
Strip-Wound Container . . . . .	17
Controlled Fluid-Fill Cylindrical-Layered Container . . . . .	18
Design Requirements and Limitations for High-Pressure Containers . . . . .	19
Possible Manufacturing and Assembling Limitations . . . . .	19
Residual Stress Limitations . . . . .	21
Other Possible Material Limitations . . . . .	25
Recommendations . . . . .	25
Proposed Materials Study . . . . .	25
Suggested High-Pressure Container . . . . .	25
FUTURE WORK . . . . .	28
REFERENCES. . . . .	29
