

TABLE OF CONTENTS

	<u>Page</u>
INTRODUCTION	1
EQUIPMENT AND EXPERIMENTAL PROCEDURE	2
Extrusion Tooling	2
Materials	3
Lubricants and Fluids	3
COLD HYDROSTATIC EXTRUSION OF 7075-0 ALUMINUM ROUNDS	3
COLD HYDROSTATIC EXTRUSION OF 7075-0 ALUMINUM AND AISI 4340 STEEL TUBING	5
7075 Aluminum	5
AISI 4340 Steel	10
COLD HYDROSTATIC EXTRUSION OF 7075-0 ALUMINUM AND AISI 4340 STEEL T-SECTIONS	14
EVALUATION OF SYSTEM VARIABLES FOR HYDROSTATIC EXTRUSION AT 500 F	16
Fluid Pressure Measurement	16
Stem-Seal Details	16
WARM HYDROSTATIC EXTRUSION OF AISI 4340 STEEL ROUNDS	17
Effect of Fluid	20
Effect of Lubricants	21
Effect of Temperature	21
WARM HYDROSTATIC EXTRUSION OF Ti-6Al-4V TITANIUM ALLOY ROUNDS	21
Effect of Fluid	26
Effect of Lubricant	26
Effect of Temperature	26
WARM EXTRUSION OF BERYLLIUM ROUNDS	28
Hydrostatic Extrusion and Drawing of Beryllium Wire	28
TENSILE PROPERTIES OF AISI 4340 STEEL AND 7075-0 ALUMINUM HYDROSTATIC EXTRUSION	29
FUTURE WORKS	30
REFERENCES	31

LIST OF TABLES

	<u>Page</u>
Table 1. Billet Lubricants Used for Hydrostatic Extrusion During This Interim Report Period	4
Table 2. Fluids Used in Warm Hydrostatic Extrusion	4
Table 3. Experimental Data for Cold Hydrostatic Extrusion of 7075-0 Aluminum and AISI 4340 Steel Tubing	6
Table 4. Experimental Data for Cold Hydrostatic Extrusion of 7075-0 Aluminum and AISI 4340 Steel T-Sections	12
Table 5. Effect of T-Die Profiles on Fluid Pressures for 7075-0 Aluminum	14
Table 6. Experimental Data for 500 F Hydrostatic Extrusion of AISI 4340 Steel Rounds	18
Table 7. Effect of Fluid on Pressures for Warm Hydrostatic Extrusion of AISI 4340 Steel	20
Table 8. Evaluation of Lubricants Used in Extruding AISI 4340 Steel at 500 F	22
Table 9. Experimental Data for 500 F Hydrostatic Extrusion of Ti-6Al-4V Alloy Rounds	24
Table 10. Room-Temperature Tensile Properties of AISI 4340 Steel and 7075 Aluminum Rounds Produced by Hydrostatic Extrusion	30

LIST OF FIGURES

Figure 1. Floating Mandrel Arrangement for Hydrostatic Extrusion of Tubing	9
Figure 2. Effect of Extrusion Ratio on Pressure for Cold Hydrostatic Extrusion of 7075-0 Aluminum Tubing	10
Figure 3. Effect of Extrusion Ratio on Pressures for Cold Hydrostatic Extrusion of AISI 4340 Steel Tubing and Rounds	11
Figure 4. Stem-Seal Arrangement Used for Warm Hydrostatic Extrusion	17
Figure 5. Comparison of Pressures for Hydrostatic Extrusion of AISI 4340 Steel Rounds at Two Temperatures	23
Figure 6. Comparison of Pressures for Hydrostatic Extrusion of Ti-6Al-4V Alloy Rounds at Two Temperatures	27
