

LIST OF FIGURES

1. a. Schematic Diagram of Thermocouple Circuit for High Pressure Apparatus
b. Schematic Diagram of High Pressure Single Wire Circuit
2. Hydrostatic Pressure Apparatus for Measuring Single Wire High Pressure Thermal EMF
3. Piston Cylinder High Pressure Cell for Measuring Single Wire High Pressure Thermal EMF
4. Pressure Temperature Distribution in Piston Cylinder High Pressure Cell
5. Pressure Calibration for AgCl Column in High Pressure Cell
6. Temperature Distribution in the Region of the High Temperature Seal in the Piston Cylinder Cell
7. Pressure EMF Per Kilobar for Temperature Interval $190^{\circ}\text{K} \rightarrow \text{T}$ Measured in Hydrostatic Apparatus
8. Pressure EMF as a Function of Pressure for Alumel at a Constant Temperature Interval in Piston Cylinder Apparatus
9. Effect of Strain on the Thermal EMF of Chromel Thermocouple Wire
10. Chromel and Alumel Pressure EMF as a Function of Temperature Interval at 20 Kb and 40 Kb
11. Platinum and Platinum 10 Percent Rhodium Pressure EMF as a Function of Temperature Interval at 40 Kb
