*Contribution #40: This investigation was supported by U.S.P.H.S. Training Grant No. 5TI-DE-0117-07 and Research Grant No. 5PO1-DE-2336-03 from the National Institute of Dental Research, N.I.H., and by the National Aeronautics and Space Administration through Rensselaer's Interdisciplinary Materials Research Center.

[†]Present address: Department of Dental Materials, School of Dentistry, University of Southern California, Los Angeles, California 90007. This paper is based on a thesis submitted to the Department of Physics and Astronomy, Rensselaer Polytechnic Institute, in partial fulfillment of the requirements of the Ph.D. degree and was presented before the Dental-Medical Materials Group of the A.I.M.E. in Las Vegas, May, 1970.

Submitted to the Journal of Biomedical Materials Research.
