**Concerning the Densities and Temperature
Coefficients of Liquid Barium and Calcium**

by A. V. Grosse and P. J. McGonigal¹

*The Research Institute of Temple University, Philadelphia,
Pennsylvania (Received June 14, 1963)*

The density of liquid barium has been measured recently by Addison and Pulham² and the density of liquid calcium was measured previously by Culpin³ in connection with his viscosity studies. No other data are available. The present authors have had
