

- C502 The Cobalt Carbonyl-catalyzed Synthesis of Dimethyl Adipate
from Butadiene, Carbon Monoxide and Methanol
Akio Matsuda and Kazuhiko Endo
Government Chemical Industrial Research Institute,
Tokyo, Mita, Meguro-ku, Tokyo
- C503 Effects of High Molecular Products on the reaction Rates of
Isomerization and Disproportionation of *m*-Xylene
Haruo Takaya, Naoyuki Todo, Tadasuke Hosoya,
Toshio Minegishi and Hideki Oshio
Government Chemical Industrial Research Institute,
Tokyo, Honmachi, Shibuya-ku, Tokyo
- C504 High pressure Synthesis of Aromatic Aldehydes in HF-BF_3 Medium
Kiyoshi Kudo, Nobuyuki Sugita and Yoshimasa
Takezaki
Institute for Chemical Research, Kyoto University
Gokanosho, Uji, Japan
- C506 Effect of Pressure on the Rearrangement of benzopinacol
Katsuhiro Tamura, Takashi Moriyoshi
Faculty of Engineering, Tokushima University,
Minamijosanjima-cho,
Tokushima
- C507 Effect of Pressure on the Hydrolysis of Tetramethylene Chlorohydrin
Shinichi Hariya and Seiji Terasawa
Faculty of Engineering, Tokyo Institute of Technology,
Ookayama, Meguro-ku, Tokyo
- C508 Partial Molal Volumes in Mixed Aqueous-Organic Solvents
Satoshi Arakawa and Seiji Terasawa
Faculty of Engineering, Tokyo Institute of Technology,
Ookayama, Meguro-ku, Tokyo
- C509 Synthesis of $\text{Ca}(\text{Fe}, \text{Mn})\text{O}_4$ under High Oxygen Pressure and their
Physical Properties
Hiroki Miyamoto, Mitsue Koizumi and Shoichi Kume
The Institute of Scientific and Industrial Research,
Osaka University
Yamadakami, Suita-shi, Osaka
- C510 High Pressure Form of Germanate-Feldspar
Mitsue Koizumi*, Shoichi Kume** and Nobukazu**
Minemura
