Dated..November..4..1974.

Dr. B.K. Agarwala,  
Head, Division of Mechanics

Dear Prof. Tracy Hall,

Mr. Paradis of the Projects Execution Division, UNDP, New York writes to me that an order for the 200 ton cubic press has already been placed with you and that he would be sending me a copy of the contract very soon. You will kindly recall that during our discussions at Provo recently I had requested you to include many small items in the list of equipment to be supplied to us. You had made a list of such items and stuck it to the press itself to make sure that you do not forget it. I am sure you are including these items so that problems do not arise at a later date. Kindly forward a list of these items to Mr. Paradis along with the prices so that an official order is placed with you to avoid difficulties in future about payments. In particular we would want the 250 pyrophyllite cubes to be charged so that demonstration could be given by you during your two-week visit to New Delhi.

The Government of India rules require that we must obtain an import license from them prior to the despatch of goods from the country of origin. To enable us to do that, please forward a list of items giving details that you are despatching to enable us to apply to the Government for the issue of a license. This may kindly be treated as very urgent since otherwise we shall be put to a terrible difficulty.

Please also let me know the probable date by which the equipment is likely to be despatched and when is the boat likely to call at the Bombay port. We would arrange your visit about 6 weeks after the equipment is received here.

My wife gratefully remembers the pleasant day that she spent with Mrs.Hall.

With very kind regards,

Yours sincerely,

*Bhagawats*

( B.K. Agarwala )
