Provo, Utah 53072

Subject: Order Control No. 87915:  
Solenoids for 230/50/1 Operation

Dear Dr. Hall:

Subsequent to our telephone conversation, I checked up on the situation in regard to the solenoid coils for 230/50/1 operation for our Indian friends, and found to my regret that there is a 2 - 3 week delivery delay on these units. Consequently, you may expect to receive these within the next 7 - 10 days. I hope this delay will not inconvenience you unduly.

These units are being despatched to you direct from our Fluid Power Division, Pewaukee, Wisconsin, and will of course be on a no-charge basis.

In due course, I will follow up on the delivery situation, and if there is any undue delay, I will certainly let you know.

Yours sincerely,

A. C. Thomas
