Dear Sir,

we got from Prof. Beck your address and ask you kindly to send us some informations about your 6/200 ton as well as 6/1000 ton presses. We are very interested in your equipments and want to proof an installation in our laboratory. Therefore we are interested in the technical detail, the delivery conditions and the prices. Looking forward your answer,

yours sincerely,

Attn: Dr. H. Vollstadt

Dear Dr. Vollstadt:

Thank you for your inquiry of 3 July 1976 concerning our high pressure, high temperature equipment.

We have under construction a 300 ton cubic press that is about 40% complete. It could be completed in six months after the receipt of an order. This press is complete in every detail including all hydraulic systems, electrical heating systems and with a compliment of spare parts and after completion would be ready to set up and run inasmuch as 100 pyrophyllite cubes with a graphite sample-heater tube would be included with the order. The anvil faces would be 5/8 inch on each edge of their square faces and the pyrophyllite cubes would be .781 inches on edge. Routine pressure of 65,000 atmospheres at temperatures above 1600 degrees celsius are obtainable.

The price of this machine is \$106,500.00 fob Provo, Utah, USA. The equipment will be available for inspection and test by your designated personnel prior to shipment. If you wish your personnel would be trained on this equipment in Provo prior to shipment at no additional cost for a period of two weeks. All costs pertaining to shipment, customs, brokerage, etc. after the press is loaded for shipment in Provo is to be borne by the customer.

Shipment or purchase of the press is subject to any and all governmental restrictions of either the USA or the DDR and any costs imposed by these governments are to be paid for by the customers

A similar 1000 ton cubic press would cost \$375,000.00 fob Provo. Delivery would be two years after receipt of an order. Terms of payment on both presses is 50% down with the order. The balance is to be paid after approval of the press upon inspection in Provo before shipment is made. Payment is to be made in USA dollars. Arrangements for payment are to be made through an approved USA bank where funds for the payment are on deposit.

Sincerely yours,

*H. Tracy Hall*
