

Dear Dr Agonwala:

Because of the ~~financial~~ complications of going back to the UNDP for additional money, we will ship 250 additional ~~tetrahydro~~ pyrophyllite cubes plus the necessary adjunct components needed for 250 experimental diamond synthesis runs free of charge.

I have added a number of tools and other extras for the press not called for in the contract and in addition to those enumerated on the notes, ^{stuck} fastened ^{to} the press.

I will send a ^{detailed} list to you soon of these things. We are in the process of constructing rugged shipping containers for the equipment and should ship by December 31st. Would you consider shipping by air freight to Bombay. I think it would cost about \$4000. and would take only ten days.

40004724

Sincerely
