Professor Tracy Hall  
Brigham Young University  
Provo, Utah

Dear Professor Hall,

On a recent meeting at the University of Texas, my friend Elliott Montroll mentioned in glowing terms your work on "amorphous" manmade diamonds.

I would very much like to know more about them. Could you kindly direct me to the proper references, or, even better, send me documents on this topic?

Yours very truly,

*B. Mandelbrot*

30 October 1978

Dear Benoit B. Mandelbrot:

Thank you for your letter of October 3rd. I apologize for the tardy reply. I have been away for one month and just returned on the 27th.

Some reprints of articles relating to man made diamonds of various types are enclosed. I hope that these may answer your questions.

Sincerely yours,

*H. Tracy Hall*

H. Tracy Hall,
