Dear Patent Resources Group, Inc.:

I have just completed your home study course "Patent Preparation & Prosecution Practice" and am interested in attending your next Patent Bar Review Course or a course in claim drafting. Would you please send literature on your future courses. Also, could you inform me as to the dates of the patent office exams and locations for 1979??

I have been inventing for many years and have pioneer patents in the field of diamond synthesis and high pressure apparatus but have a real need to become familiar with the patent aspect of inventing. In the past, I have felt that I have not been communicating well with the patent attorneys and that they have not been communicating well with me. I want to do my part to rectify that situation.

An article, "The History and Present ~~Status~~ of Synthetic Diamond" by K. and Julia Nassau, describing some of my work is enclosed and may be of interest to you.

I might say that I have been interested for years and have made inquiries to lawyer friends and others as to where a person could get a course such as yours and no one knew. At any rate, I saw your advertisement in a technical journal (Physical Today, I think) and was elated to learn that there was such a thing. Unfortunately, I have found it difficult to set aside sufficient time to master the course until recently.

Sincerely yours,

H. Tracy Hall
H. Tracy Hall

P.S. A little kit
containing graphit, Nickel
and manmade diamond is enclosed.
