

PROPOSAL NO. DMR-7708469	INSTITUTION U. California @ San Diego	PLEASE RETURN BY 03-10-77
-----------------------------	--	------------------------------

PRINCIPAL INVESTIGATOR MATTHIAS, B. T.	NSF PROGRAM QSLP
---	---------------------

TITLE
"SUPERCONDUCTIVITY OF MULTICOMPONENT MATERIALS"

COMMENTS (CONTINUE ON ADDITIONAL SHEET(S) AS NECESSARY)

I must say that Prof. Matthias' proposal is impressive as well as persuasive and I mean that sincerely. His proposal delineates carefully and clearly the progress of research on "high temperature" superconducting materials and insightfully explores the possibilities for continued research in this most important area of endeavor.

Couple this with Prof. Matthias' proven record of outstanding research accomplishments and one can only say that his proposal should certainly be supported.

As an aside, this is the longest proposal I have seen in the 22 years that I have been reviewing such things but it was not boring.

RATING: EXCELLENT VERY GOOD GOOD FAIR POOR

Verbatim but anonymous copies of reviews will be sent only to the principal investigator/project director on request. Subject to this NSF policy and applicable laws, including the Freedom of Information Act, 5 USC 552, reviewers' comments will be given maximum protection from disclosure.
