Authors, Chemical Experimentation Under Extreme Conditions:

I have been informed by the Production Department at John Wiley and Sons that we should shortly receive galley proofs for the above volume. Advertising is also being prepared to assure the greatest possible sales. In this connection, would you kindly supply the names and addresses of one or two leaders who you feel should receive a complimentary copy of the book upon publication and who might recommend the book to students or colleagues. I hope to send this information to the publishers by February 1.

I look forward to your reply.

Sincerely,

Bryant W. Rossiter
Editor
