RESEARCH INSTITUTE

Dr. H. Tracy Hall
1711 No. Lambert Lane
Provo, Utah 84601

Dear Tracy,

Thank you for the profitable and pleasant visit of July 5-6, 1978. It was certainly informative and interesting to observe your method of making the Indium capsules as well as the other enterprises of yours. I am sure that the problems of obtaining capsules for high-pressure testing of fluids here at the University of Dayton have been solved.

Please be sure and charge the University of Dayton for your material costs and, as I indicated, do not consider the original agreement to be the maximum charge. I hope you are fully reimbursed for your valuable contributions to the efforts of our project.

I will be sending along to you a copy of my dissertation which I hope you find to be accurate. Much effort has gone into it during the past three years or so, and I hope it is a worthy contribution.

Finally, I wish you best of luck in your efforts on your farm and solar heating as well as further successes in your high pressure work. Best wishes to your family. I remain,

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Kurt C. Rolle".
