PLEASE REPLY TO:

December 14, 1956

Mr. H. Tracy Hall
Director of Research
Brigham Young University
289 Eyring Science Center
Provo, Utah

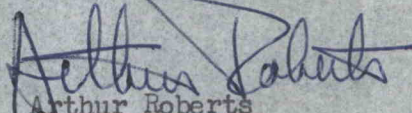

Dear Mr. Hall:

We wish to thank you for your recent inquiry regarding our 'T Hart high pressure equipment and are pleased to enclose herewith for your information literature concerning same.

Also included is a reprint from Research, Vol. 9 dated March 1956 entitled "High Pressure Research" by Dr. A. Michels, who is the designer of this equipment and acts as our consultant.

We look forward to a future discussion with you regarding your possible high pressure equipment requirements and, in the meantime, if we may be of further service, or supply you with additional information, kindly advise.

Very truly yours,

Arthur Roberts
Sales Engineer
