

The University of Western Ontario, London 72, Canada

Faculty of Science
Department of Geophysics

August 9, 1972.

Dr. H. T. Hall,
Consulting Chemist,
1711 North Lambert Lane,
Provo, Utah.

Dear Dr. Hall:

This is to confirm our recent telephone conversation that we will definitely be going ahead with an order for a cubic press based upon your quotation dated 11th May 1972. Because the money we obtained is less than your quotation we will not be able to get the full equipment mentioned there but, as far as I can see at the present time, the only doubtful point is the number of extra binding ring/anvil assemblies we will require. I think it will probably mean we can only afford six extras (two of each size) but a great deal will depend upon what I extract from my Dean.

Helmuth Schloessin and I are working on the details of what we want and I hope we will be able to transmit a formal order to you within the next two or three weeks.

I am sorry I missed you on your visit here particularly since it would have been a good opportunity to get your comments on how we propose to get the equipment into the building.

Kind regards.

Yours sincerely,

A. E. Beck
Professor & Head, Geophysics
Acting Chairman, Geology
